MAKSIM ANTIPEV

Winnipeg, Manitoba, Canada | 204-396-0983 | maxantipev@gmail.com | linkedin.com/in/maksimantipev

PROFESSIONAL PROFILE

High-impact Analytics & Data Professional with over a decade of experience driving operational excellence through the intersection of data engineering, **modern AI architectures**, and business strategy. Expert in designing scalable data models and operationalizing Machine Learning within real-life business processes—specializing in **time-series forecasting** for Order and WFM Contact volumes, semantic layer deployment (Malloy, Credible, Malloy Publisher), and **matrix factorization** for recommendation engines. Proven track record in the e-commerce and food delivery sectors of delivering high-adoption analytics products (**80%+ usage**) that bridge the gap between complex data infrastructure and executive-level decision-making.

Integrates deep technical acumen in SQL, **dbt,** and BigQuery with a robust foundation in **Operations Management consulting** (Theory of Constraints) and **Commercial Real Estate valuation**. This unique dual career history allows for the delivery of technical solutions that are grounded in financial viability, process efficiency, and strategic ROI. A results-oriented leader dedicated to helping stakeholders translate complex datasets into actionable strategies and effective, data-driven decisions.

CORE COMPETENCIES

- **Analytics Engineering:** Advanced SQL (BigQuery, Redshift), LookML, Malloy, dbt, Unified Star Schema (USS), Semantic Layer Development, GitHub, Airflow (Ingestions, Transformation, Orchestration).
- **Business Intelligence:** Tableau (Desktop/Server), Looker, Looker Studio, Power BI, Power Query, Power Pivot (DAX), Crystal Reports, Sage BI.
- **Operations & Strategy:** Operations Management, Theory of Constraints (TOC), Process Mapping (Visio, Drawio), NPV/ROI Analysis, Strategic Planning, Financial Modeling for Business Valuation and Real Estate Analysis and for FP&A.
- **ML Implementation:** Time-Series Forecasting (ARIMA+), Recommendation Systems (Matrix Factorization), BigQuery ML, Automated Data Pipelines.
- **Data Engineering:** Apache Airflow, Google Cloud Datastream, Snowflake, BigQuery, dbt (Layering, Staging, Marts), Python, Ingestion & Watermarking Strategies, Pipeline Migration, Agentic AI Tooling (Claude Code, MCP, CrewAI), Cross-Cloud Synchronization.

PROFESSIONAL EXPERIENCE

SKIPTHEDISHES (JUST EAT TAKEAWAY) | Winnipeg, MB | 2020 – Present

Leading North American technology company and food delivery e-commerce platform.

Senior Data Engineer | April 2026 – Present

- **Modern Data Stack & AI Innovation:** Architected functional semantic layer prototypes utilizing Malloy, Credible, and Malloy Publisher locally and on Google Cloud Run to standardize core metrics, delivering Analytical insights using Malloy notebooks and advanced agent-built HTML Data apps.
- **Applied Agentic AI Systems (Microsoft & Simplilearn Certified):** Completed the 10-week Microsoft-backed certification in *Applied Agentic AI: Systems, Design & Impact*, designing and implementing a multi-agent market research and GTM workflow system using n8n, CrewAI, and Model Context Protocol (MCP) servers. Built and evaluated a 4-agent autonomous pipeline (Planner, Research, Analyst, Strategy) with strict source-tracing, automated synthesis, and dynamic Google Docs export.

- **Cross-Platform Ad Tech Data Integration:** Engineered automated data ingestion and dbt transformation pipelines to integrate Topsort ad performance data into BigQuery and the Partners' Portal. Implemented a watermark-based extraction strategy tied to Snowflake refresh schedules to guarantee complete cross-cloud data syncs from Snowflake to BigQuery. Built custom customer-segmentation reporting to bridge native Topsort limitations, enabling global restaurant partners to track real-time campaign performance and optimize ROI.
- **Data Engineering Standards & AI Enablement:** Spearheaded department-wide data engineering standards by defining dbt layering best practices (Staging, Intermediate, Marts) and standardized data mart naming conventions. Custom-built Claude Code AI agent skills grounded in these standards to accelerate pipeline development, and led cross-functional alignment sessions to establish unified Data Product definitions for the analytics community.
- **Data Pipeline Engineering & ML Operations:** Maintained and optimized production dbt models by resolving complex data discrepancies and migrating legacy, cross-department pipelines into a unified dbt framework. Built high-throughput batch and real-time ingestion pipelines utilizing Apache Airflow and Google Cloud Datastream. Corrected anomalous machine learning model outputs to maintain reliability across legacy production ML pipelines, directly supporting downstream product teams.

Senior Analytics Engineer / Senior BI Analyst | July 2022 – April 2026

- **Rapid Semantic Layer & USS Deployment:** Architected and deployed a robust Looker Semantic Layer for the Customer Service domain in just 2 months. Leveraged **Unified Star Schema (USS)** modeling to resolve complex "fan-out" and "chasm trap" issues, establishing a "Single Source of Truth" that enables consistent metrics and significantly reduces time-to-insight for global stakeholders.
- **ML-Driven Personalization:** Implemented a functional recommendation system for "Trending Near You" and "Popular Cuisines" using **matrix factorization**, directly enhancing user discovery and driving order conversion.
- **Autonomous High-Granularity Forecasting:** Engineered a custom forecasting system (BigQuery ML ARIMA_PLUS) for **Order Volume**. Overcame standard 90-day ML limitations to deliver a **365-day autonomous horizon** at daily and country-city-level granularity. Integrated automated data quality checks for deviation detection to ensure model reliability at scale.
- **WFM Forecasting Transformation:** Orchestrated the transition from manual to automated **Contact Volume Forecasting** by developing a bi-directional ML pipeline. Integrated BigQuery with Google Sheets for specialist evaluation, then automated the ingestion of approved snapshots back into BigQuery and the **Calabrio WFM tool**; improved Canada forecast precision by 5% and reduced manual execution by 50%.
- **Regulatory Data Architecture:** Engineered a global annual reporting solution for EU Digital Service Act (DSA) compliance, ensuring data accuracy and mitigating multi-million dollar regulatory risks.
- **Product Adoption:** Built and maintained 18+ high-integrity datasets and 30+ core KPIs, achieving an 80%+ adoption rate by providing a reliable "Single Source of Truth" for Customer Services.
- **Strategic Concept Design & Modeling:** Conducted extensive research to design the conceptual framework and operational process for a **School Meal Delivery program**. Developed the supporting financial model and strategic business case to utilize the existing Skip platform to capture this additional market segment.
- **ML-Driven Operational Efficiency:** Engineered and submitted a specialized Machine Learning solution to proactively reduce "Out of Stock" (OOS) incidents in grocery delivery. Focused on improving customer experience by preventing OOS friction and reducing operational costs related to courier wait times and refund processing.

Business Intelligence Analyst (Operations & Finance) | July 2020 – July 2022

- **E-commerce Revenue Innovation:** Spearheaded the idea and developed a **Minimum Viable Product (MVP)** using BigQuery ML to implement "Frequently Bought Together" logic. Presented the solution to the Product Team as a strategic driver to increase average basket value.
- **Fraud Prevention & Cost Control:** Developed a Clawback Ratio Dashboard and high-level SQL tracking for Gift Card fraud. This logic served as the foundation for training the Fraud Team and established rules for identifying fraudulent actors by linking complex datasets (IPs, addresses, emails), which were later implemented in **Ravelin**.
- **Market Growth Analytics:** Developed a specialized data mart for Skip Express Lane to optimize operational tracking and regional expansion performance.
- **Data Migration:** Successfully migrated legacy HR dashboards to a Unified Star Schema on Amazon Redshift, improving system performance and reducing maintenance overhead.

MANITOBA HARVEST | Winnipeg, MB | 2018 – 2020

Global leader in natural food manufacturing.

Data Analyst / Report Writer

- **Process Automation:** Optimized supply chain operations by integrating Sage 300 ERP with a Transportation Management System (TMS) via SQL and VBA to automate freight rate calculations.
- **Operations Mapping:** Streamlined order fulfillment workflows using **Visio** and digital document flow integration to reduce manual bottlenecks.

OPERATIONS MANAGEMENT CONSULTING

BUSINESS MANAGEMENT CONSULTANT | 2007 – 2015 *Specializing in Operations Strategy and Theory of Constraints (TOC).*

- **Manufacturing Throughput:** Engineered an operations tracking model for a manufacturing client that increased production capacity by **40%** (from 50 to 70 units per day) without increasing headcount.
- **Supply Chain Optimization:** Facilitated process shifts for a retail chain using TOC principles, resulting in a **17% reduction in inventory** and generating $20,000 in cash flow within 60 days.
- **Strategic Advisory:** Conducted investment analysis (NPV, "What-if" scenarios) and authored 20+ business plans for clients in Real Estate, Agriculture, and Distribution.

REAL ESTATE & INVESTMENT EXPERIENCE

PORTFOLIO ADMINISTRATOR | SAM Management Inc. | 2016 – 2017

- **Asset Management:** Executed a marketing and management plan for a residential portfolio that secured 15 new tenants in 2 months, generating $13,000 in immediate revenue.

MARKET RESEARCH ANALYST | Lindex Properties | 2016

- **Investment Strategy:** Developed complex financial models for a Real Estate Syndicate to realize acquisition strategies and evaluated property feasibility for executive stakeholders.

APPRAISAL SPECIALIST / ANALYST | Menshov & Partners | 2010 – 2013

- **Professional Valuation:** Prepared appraisal reports for commercial machinery and real estate, maintaining strict compliance with Manitoba Securities Commission standards.

EDUCATION & PROFESSIONAL DEVELOPMENT

- **Applied Agentic AI: Systems, Design & Impact** | Simplilearn | 2026
- **The Complete dbt Bootcamp Zero to Hero** | Udemy | 2026
- **Google Looker Masterclass** | Udemy/Google | 2025
- **Analytics Engineer Bootcamp** | Udemy | 2024
- **The Product Management for AI & Data Science Course** | Udemy | 2022
- **Financial Modeling & Valuation Analyst (FMVA)™** | Corporate Finance Institute (CFI) | 2018 – 2020
- **Power BI Training / Enterprise DNA** | Auckland, New Zealand | 2020
- **Data Analytics for Managerial Decision-Making** | Asper School of Business | 2020
- **SQL Specialization Courses** | Success Skills Centre, Winnipeg | 2016 – 2017
- **Real Estate Salesperson's License** | Manitoba Securities Commission | 2016 – 2018
- **Master's Degree in Economics and Management** | FESTU | 2007
- **Diploma in Business and Real Estate Valuation** | FESTU | 2005
